```
================================================================================
Project Code: STLU0001
Project Name: Missouri Likely Voters
Prepared for: Steven Rogers and Evan Rhinesmith
Interviews: 900
Field Period:  June 23, 2020 - July 01, 2020
Project Manager: Sam Luks - 650.462.8009
================================================================================
```

YouGov interviewed 1,106 respondents who were then matched down to a
sample of 996 registered voters and then subset on 900 likely voters
to produce the final dataset. The full set of survey starts were matched
to a sampling frame on gender, age, race, and education. The frame was
constructed by stratified sampling from the Missouri registered voter portion
of the 2018 Current Population Study voter supplement with selection within
strata by weighted sampling with replacements.

The matched cases were weighted to the sampling frame using propensity
scores. The matched cases and the frame were combined and a logistic
regression was estimated for inclusion in the frame. The propensity
score function included age, gender, race/ethnicity, and years of education.
The propensity scores were grouped into deciles of the
estimated propensity score in the frame and post-stratified according to
these deciles.

The weights were then post-stratified on 2016 Presidential vote choice,
and a two-way stratification of gender and age (4-categories) from
the Missouri voter file to produce the final weight.
